# 16-10 Wagon Master Ultra

High Energy

10% Fat

## FEEDING DIRECTIONS

Feed to Ruminants on pasture

All Beef Cattle, Dairy Cows, Sheep & Goats

16-10 Wagon Master may be fed free choice in lick wheel feeders.

Observe all recommendations!

◆ Provide adequate roughage.

This product contains copper. Avoid excessive consumption by sheep and goats.

◆ Provide unlimited drinking water. Consumption control may be obtained by the distance between the water source and the lick tank. By increasing the distance, a reduction in consumption may be seen.

◆ Provide a good quality free choice mineral.

◆ Keep lick tanks in proper working order, i.e. wheels freely turning.

◆ Do not let tanks become empty of supplement.

◆ Consumption should not exceed 6 lbs. per head per day, based on a 1,000 lbs animal.

◆ Maintain proper feed management practices to achieve an optimal consumption per head.

◆ 16-10 Wagon Master may be mixed with grains or used to top dress silage or hay and/or other roughages. Consult your local representatives for specific mixing recommendations based upon your feeding program.
